

Subject: Social Science History

Aspect: Bridging-Assignment for the students going from grade 6 to 7

Learning Objectives : Children will learn about the science of exploring and excavating.

Read the passage carefully and answer the following questions.

One fine morning in 1908 a cowboy named Kapil saw some sun-bleached bones .He pried the pieces of bones out with his knife .He took the finds back to his house ,where they lay around for seventeen years .In 1925,someone sent the bones to Jesse Dade Figgins ,the director of the Colorado Museum of Natural history. The following year ,Figgins dug the same area and found more bones and stone tools .It was then realised that it was a proof of human existence at the same time when long –extinct animals inhabited that area.

1) The excavated items fall under which historical sources ?

Sources of history:

History is studied on the basis of records of the past events .These records are known as sources of history. The scholars who study the past using various sources are called historians .They explore clues and material left behind by the people in the past.

❖ Make a project report on Archaeological and literally sources.
