

EVS

Our Neighbourhood

NEIGHBOURHOOD SCHOOL

- Neighbourhood school means the nearest primary/upper school within walking distance from the child's residence.
- The neighbourhood school concept relates to availability of a school within safe distance from the child's area.
- The important reason for a neighbourhood school is that school children can walk or bicycle on their own, to school.

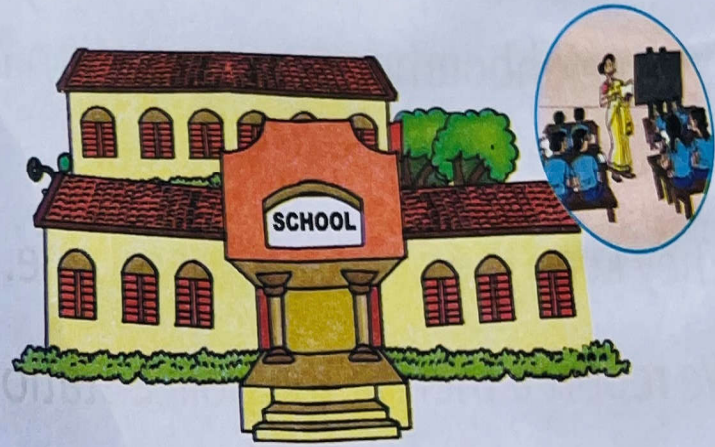

Neighbourhood Markets

- Many shops are permanent and some are temporary like hawkers and vendors.
- The major advantages of these markets are that they are in the vicinity of our homes.

School

Children in our neighbourhood go to a nearby school to study.

We have many **teachers** and other helpers in a school.

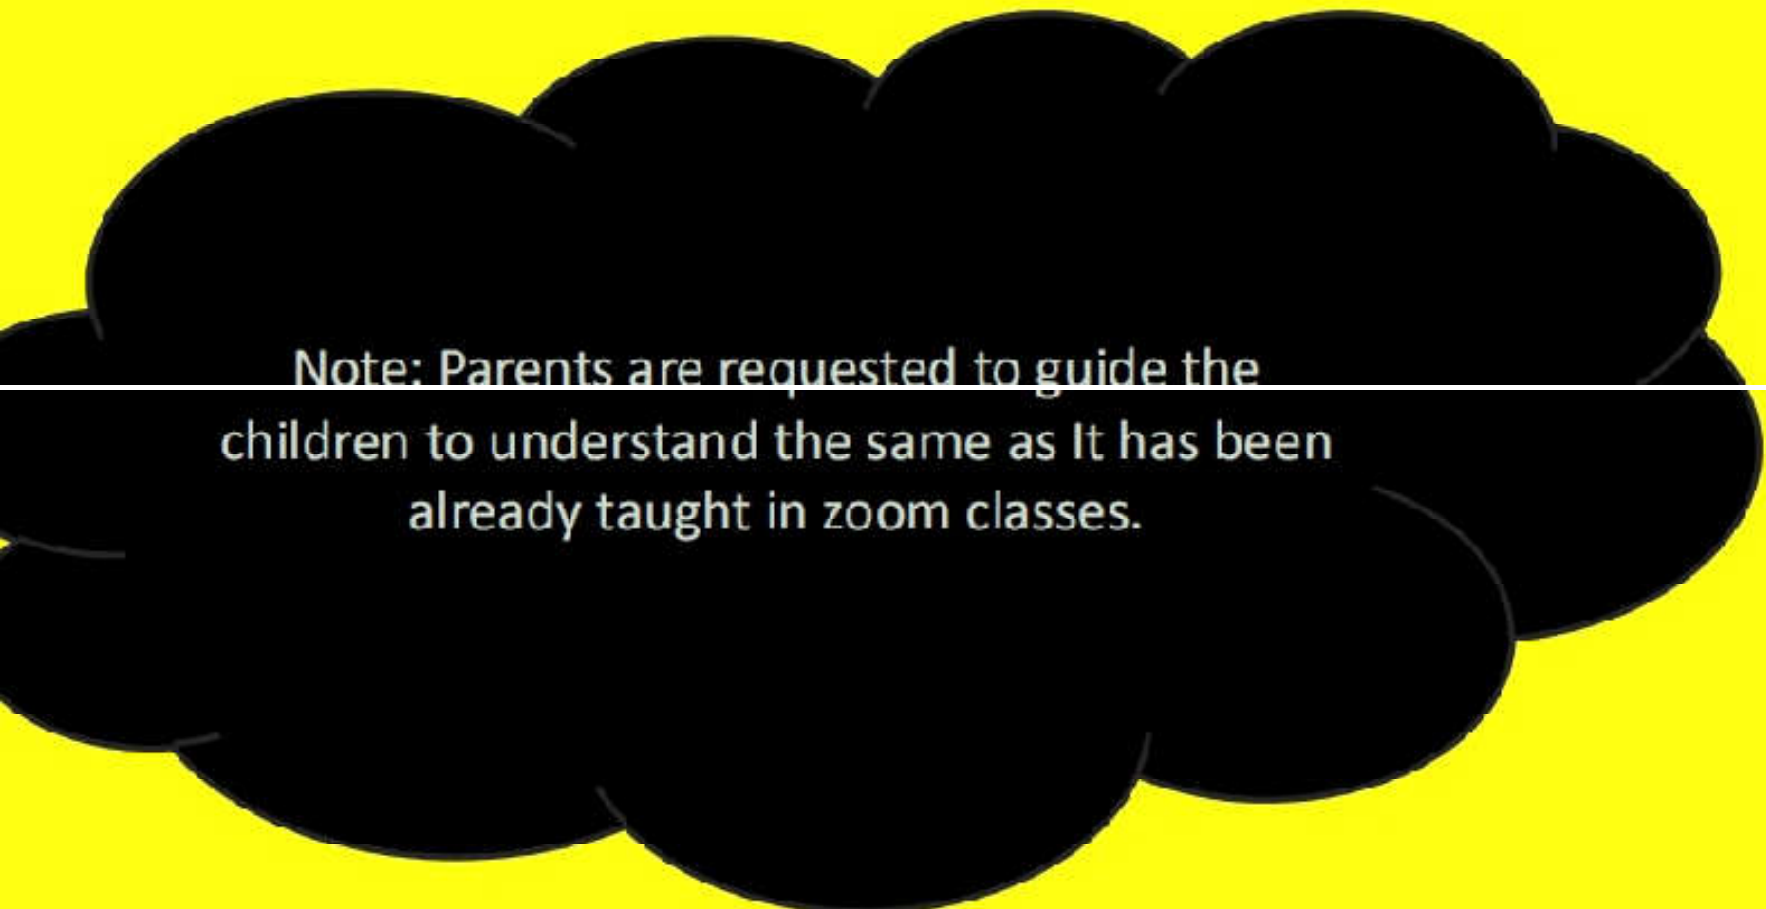

Market

The market is a large place with many **shops**.

There is a grocery, bookshop, shoe shop and other shops in our market.

We buy fruits and vegetables at the market.

Note: Parents are requested to guide the children to understand the same as It has been already taught in zoom classes.
